DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Komiyama et al. U.S. Patent 5,110,388 A.

Komiyama et al. discloses a method of applying a protective coating to a bottom surface of a wafer A, comprising; applying a protective foil 3 onto a mounting tape 2; and mounting a bottom surface of the wafer A onto the mounting tape with the protective foil 3 facing and in contact with the bottom surface of the wafer A (see figure 2) to protect the bottom surface thereof (see figure 3). Komiyama et al. also discloses dicing the wafer A including the protective foil 3 into dies (see figure 3); and picking the dies with the protective foil off the mounting tape 2 (see figures 5 and 6). The mounting tape 2 is a UV foil; and the step of picking off the dies includes applying UV-radiation B to separate the UV-foil 2 from the protective foil 3 (see figure 4).

Allowable Subject Matter

3. Claims 1-3 and 4 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: The related art disclosed in Sugino et al. appears to be the closes related prior art to claims 1-4 but lacks anticipation on filling the trenches by applying a material to the bottom surface of the wafer as required by claims 1 and 3. In the examiner's opinion it would not have been obvious to fill the trenches with the material applied to the bottom surface of the wafer in the Sugino et al. reference.

Response to Arguments

5. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kimura et al. and Nixon et al. disclose methods for dicing a semiconductor wafer by forming trenches in a front surface of the wafers and grinding a back side of the wafers.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

8. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angel Roman whose telephone number is (703) 306-0207. The examiner can normally be reached on Monday-Friday 8:30am-6:00pm.
